

LOTERÍA DE CÁLCULOS

COMPLETEN CON CÁLCULOS QUE SIRVAN PARA TACHAR LOS NÚMEROS DEL CARTÓN, COMO EN EL EJEMPLO.

A 3x7 grid of numbers. The numbers are: Row 1: ~~12~~, 34, 60; Row 2: 24, 38, 45, 72; Row 3: 18, 50, 68. The numbers 12, 34, 60, 24, 38, 45, 72, 18, 50, and 68 are crossed out with red lines. Red arrows point from the crossed-out numbers to empty boxes: 12 to a box on the left; 34 to a box above; 60 to a box above; 24 to a box on the left; 38 to a box below; 45 to a box above; 72 to a box on the right; 18 to a box on the left; 50 to a box below; 68 to a box below. There are also three empty boxes above and three empty boxes below the grid.

COMPLETEN CON 4 CÁLCULOS DISTINTOS QUE DEN COMO RESULTADO 30.

A central orange star with the number 30 inside. Four empty boxes are arranged around the star, each with a curved arrow pointing towards the star: a blue box at the top left, an orange box at the top right, a pink box at the bottom left, and a blue box at the bottom right.
